PROOF OF REVIEW

USER FAQ

PROOF OF REVIEW

What is Proof of Review?

Proof of Review is a review service for crypto projects and their development teams. A PDR review requires verification and correlates to the level of information provided and identity verification the developer is willing to provide. Our system is designed to help build trust and transparency between the cryptocurrency community and developer(s). For more information see our whitepaper [here](#).

What is the aim of of Proof of Review?

Our reports are intended to centralise all the fundamental analysis that a miner, trader or any other interested party may undertake in relation to a cryptocurrency or blockchain relevant company or project. Our aim is to refine our user's due diligence process by offering an objective, honest and unbiased evaluation of a project's fundamentals.

What is the difference between the verification tiers?

A PDR review requires verification and correlates to the level of information provided and identity verification the developer is willing to provide. Our system is designed to help build trust and transparency between the cryptocurrency community and developer(s). For more information see [here](#).

Who conducts the reviews?

The reviews are conducted internally at Proof of Review. We work closely with each applicant to acquire the right information and our team will seek to independently verify any information provided to us.

The developers are paying you for a review, does that mean the reports won't be critical?

Proof of Review have a very strict policy that our reviews are final. This means that unless any information a developer has provided is factually incorrect, we will not make any changes or removals to the report if requested by the applicant or developer.

It is important that Proof of Review remains objective in our publications and please be aware that our duty is to serve our visitors with honest and unbiased reports. We do not offer refunds, make undocumented amendments to reviews or offer any special favours to any applicant or developer with whom may engage in business with from time to time.

What assurance do you provide with your reviews?

No assurances of any kind are provided with our reviews. Our reviews are not intended as financial advice and should not be taken as such. Our reviews are completed as a paid transaction by the listed developer and are published with consent of the developer and wider team. Whilst we do work closely with the applicant during the review process, our commentary is non-negotiable and all reports are final at the date of publication. The applicant is shown a draft copy prior to publishing however only factually incorrect information is amended at this point.

Proof of Review will provide a review of a projects fundamentals at a particular point in time.

PROOF OF REVIEW

Why don't you cover X in your reviews?

If you have any suggestions please get in touch using contact@proofofreview.com.

What is the \$PDR token for?

The \$PDR token is currently used for marketing purposes. Our roadmap is working towards a Proof of Review members portal for which the token will be required.

Can I join your team?

Please get in touch using contact@proofofreview.com

Token FAQ

What happened to \$POD?

Based on initial feedback to our whitepaper from the wider community, we decided to slightly tweak our offering and as a result felt that a change of name was due. We have conducted a swap of tokens and the new \$PDR has been distributed to users and is now available to trade again on IDEX.

What's \$PDR's coin characteristics?

The contract address for the \$PDR token is:

<https://etherscan.io/address/0x08c507046e12cd1538741d067d28411f2b922062>
